Subject No. 332.
Agricultural Bank at Palhalli.

Mr. Venkatakrishnayya.

Summary of discussion.—As it is difficult for the Bank to comply with the Government order requiring it to pay the loan of Rs. 30,000 due to Government by annual instalments of Rs. 2,000, it is requested that the Bank may be permitted to repay (1) either the loan by annual instalments of Rs. 500 or (2) merely the interest on the loan for the ensuing ten years, the repayment of the loan itself being allowed to be made by annual instalments of Rs. 1,000 to be paid at the expiration of that period.

Reply of Government.—Representations about the needs of a single Bank may be made through the Inspector of Agricultural Banks and the Deputy Commissioner.

Subject No. 333.
Concessions to settlers at Kaglibore kaval.

Mr. Amble Anniah Pandit.

Summary of discussion.—It is prayed that orders may be passed for granting house sites free of cost to raiyats intending to build houses and settle themselves at the Kaglibore kaval, and two acres of dry land also free of cost to each cultivating raiyat owning a plough and a pair of bullocks.

Reply of Government.—Referred to the Deputy Commissioner for the grant of such concessions as are possible.

Subject No. 334.
Tolls on the Yedatore bridge.

Mr. Anantarajayya.

Summary of discussion.—The bridge near Yedatore being known as the Chamaraja Bridge, tolls collected thereon may be abolished after the cost of the bridge is realized.

Reply of Government.—Noted. The toll revenue will be assigned to the Local Board. It is not clear why this proposal is made.

Subject No. 335.
Levy of assessment on wet lands below Chamaraja channel extension, Yedatore Taluk.

Mr. Amble Anniah Pandit.

Summary of discussion.—The wet lands below the Chamaraja channel extension in the Yedatore Taluk may be assessed at rates similar to those prevailing under the Hulhalli channel in the Nanjangud Taluk, and as no hot-weather supply is claimed by owners of land under the former channel, orders may be passed for not assessing these lands at rates fixed for the wet lands under the old channel.

Reply of Government.—Referred to the Superintendent, Revenue Survey.

BANGALORE DISTRICT.

Subject No. 336.
Water-supply to the town of Nelamangala.

Mr. D. Dasappa.

Summary of discussion.—The scarcity for water in the town is much felt every year as wells dry up completely. Water may be caused to be supplied by laying out branch pipes from the Hessarghatta Pumping Stations, or by the tank being reserved for drinking purposes. There will not be much loss to Government, as the *atchkat* under the tank is only Rs. 647 and odd, and most of the wet lands may be assessed at garden rates, since garden cultivation mostly prevails there.
